Rajahmundry, Andhra Pradesh , India

CAREER SUMMARY

Motivated Computer Science undergraduate with 2+years hands-on experience in Flutter, Firebase, Java, C, and RESTful API integration, specializing in cross-platform mobile application development. Skilled in building responsive UI, real-time applications, and machine learning-based solutions using CNN models. ServiceNow Certified System Administrator and Application Developer with strong problem-solving, teamwork, and software development skills.

EDUCATION

- Aditya Engineering College** 2022 – 2026
Bachelor of Technology in Computer Science and Engineering Surempalem , Andhra Pradesh
GPA: 7.54/ 10.00
- Relevant Coursework : OOPS , DBMS , Operating System , Computer Networks , Software Engineering .

PROFESSIONAL EXPERIENCE:

June 2025

FLUTTER DEVELOPER INTERN (Technical Hub, Surempalem)

- Developed and delivered 3+ cross-platform mobile apps using Flutter, collaborated with clients on requirements and integrated third-party APIs (e.g., GitHub API, Google Maps API) to enhance app functionality.

SKILL:

- Programming Languages:** C, Java, Dart , SQL.
- Mobile & Web Technologies:** Flutter, HTML5, CSS3, Firebase, REST APIs
- Platforms:** Git, GitHub, ServiceNow, Firebase Realtime database.
- Developer Tools:** Android studio, Figma, VS Code, Postman , Github
- Soft Skills:** Strong communication, adaptability, teamwork, problem-solving, and consistency

PROJECTS:

Fitness Club App

August 2024

- Developed a feature-rich fitness app with 50+ categorized workout plans and 100+ instructional videos.
- Crafted responsive UI using Flutter widgets, focusing on intuitive navigation and minimal design.
- Improved user retention by 35% through personalized recommendations and a visually engaging interface.

College Car Tracking App

October 2024

- Built a real-time vehicle tracking app with dual-role access for Admin and Drivers, managing a fleet of 10+ college Vehicles.
- Admin can view running/non-running cars via a pie chart, manage car lists, and track all running cars on a single map.
- Reduced tracking errors by 35% by implementing consistent location update intervals and fallback handling.

FlutterVerse App

June 2025

- Created a community-driven mobile app for developers to share Flutter resources, tutorials, and code snippets.
- Integrated Firebase for real-time database and user authentication, enabling secure logins and seamless content updates to improve user experience.
- Implemented RESTful APIs to fetch and organize 200+ Flutter resources, improving accessibility and search Efficiency.

Major Project:

January 2026

ECG Report Analyzer

- Developed an intelligent ECG Analyzer system using Machine Learning techniques to classify ECG images and generate automated diagnostic outputs with improved prediction accuracy.
- Implemented a Convolutional Neural Network (CNN) model for ECG image classification, enabling 99% accurate feature extraction and improved automated diagnosis performance.
- Performed functional, negative, and validation testing on 10+ ECG image inputs to ensure system reliability and accurate predictions across different scenarios.

CERTIFICATIONS

- Certification in C Programming
- Edex: Certification in Java
- ServiceNow: Certified System Administrator
- ServiceNow: Certified Application Developer
